EDUCATION

Washington and Lee University, Lexington, VA

May 2019

Bachelor of Science in Computer Science

- **GPA:** 3.572
- **Pertinent Courses Taken:** Algorithms, Android App Development, Computer Organization, Data Structures, Distributed Systems, Intro, Software Development

EXPERIENCE

Ancient Graffiti Project, Lexington, VA and Washington, D.C.

June-August 2017

Java Web Developer and Researcher

- Developed for a website and search engine dedicated to preserving, studying, and locating ancient graffiti
- Worked on a team with two other developers for a group of classicists
- Improved search accuracy and efficiency with the Elasticsearch Java API using a custom index-time analyzer
- Created a 'sort-by' feature for searches, an onscreen Greek keyboard, a homepage footer, and button tooltips
- Spent the final week of the project in Washington, D.C. at the Harvard Center for Hellenic Studies directly working with the classicists to finalize changes

RECENT INDEPENDENT PROJECTS

cooperbaird.com: Personal website developed from scratch using HTML and CSS

Flap Flap Bird: A desktop clone of the popular mobile game Flappy Bird in Java

Pace Calculator: A runner's tool with a GUI for calculating time, pace, and splits for races and workouts
